

Trusted Manager (TMAN) II GSA Purchasing

Trusted Manager

Trusted Manager (TMAN) II is a multi-level security (MLS) cross-domain intelligence sharing solution. TMAN II provides a secure platform for transferring data files of approved types, streaming data, and imagery products to and from networks operating at different security levels. Strict security requirements, including auditing and archiving, are enforced in accordance with Director of Central Intelligence Directive (DCID) 6/3 standards. Currently accredited by the Defense Intelligence Agency (DIA) and on the UCDMO Baseline, TMAN II is the solution to data sharing across intelligence networks.

TMAN II is a Lockheed Martin product created and maintained by a dedicated team of developers, testers, information assurance personnel, field specialists, and trainers. The TMAN II team has a proven track record in customer satisfaction with successful site installations, hands-on training, and mission support. TMAN II is now available on the GSA schedule to provide a contracting vehicle for all Government organizations.

On UCDMO List.

GSA

To view TMAN II on GSA go to www.gsadvantage.gov, then type TMAN II in the search bar and click GO.

The GSA catalog provides options for x86 or SPARC platforms, in either a one pack or a two pack configuration. Default configuration is without a raid, if a RAID is wanted to handle higher volume of traffic through TMAN II it can be added onto the order. TMAN II does have a 24x7 support line that can be used for any problems that occur after delivery is complete, this service is also available through GSA. For more information on TMAN II products listed on GSA contact Trusted Manager team at: TMAN.info@lmco.com.

Professional Services may also be purchased through GSA. Professional services can be used for many different things that require hours or travel to perform. Just purchase the quantity needed after an RFP is used to negotiate what is needed for desired service. Services can be anything from a site installation and accreditation to special documentation or training for TMAN II.

The most current and accredited TMAN II version at time of purchase is always delivered with system.

*TMAN II products may be/are subject to the controls of the U.S. Department of State.
Version 3.5 Revision 6/7/2011
